Voice Notes I recorded on my phone:

So I think the file name reader worked on the first on so figure out what I did to make it work

In order to search for customers take the search movies method from the customers Dao file impl I believe

So I have it search for customers by their name I think and then have it get their customer ID and display display customer

Display appointments so you find first got a find the matching customer and then you got a find their ID and then you got a find the appointment they have and get all that

If you have time move all of the file dao stuff to the service class
_____
Other notes:

startime
endtime
check for overlapping

NEW REQUIREMENTS:
YOU CANNOT ADD A CUSTOMER W/ SAME NAME & DOB AS A DIFF CUSTOMER

AFTER THE APPT OCCUR YOU CAN ONLY UPDATE THE TOTAL BILL AND THE NOTES

CHANGE appointmentNumber to appointmentDate

SLOTS:
M-F: 7:30AM - 12:30PM 1:00PM - 6:00PM
